

Nesne Tabanlı Programlama I Lab. Dersi

Quiz-4 raporu

152120191055-Ferdi İslam Yılmaz

“Player.h” dosyası için getAge() fonksiyonu verilmiş ama hiç kullanmadık. Aynı sınıf içerisindeki private olarak tanımladığımız Move fonksiyonlarını da kullanmaya gerek duymadım onlar olmadan da işlem yapabiliyoruz.

Diğer sınıflardaki set fonksiyonlarını da kullanmadım çünkü constructor’larda direkt otomatik olarak set ettim. Son olarak FootballPlayer sınıfında getName ve getAge fonksiyonlarını ekledim ambiguous hatası almamak için.

```
Microsoft Visual Studio Debug Console
